Przemysław Zalewski

Senior Frontend / Full-Stack Developer from Wrocław, Poland. Product engineer with 15+ years of commercial experience, shipping React since 2017. Before that I built and ran mobile apps in C# and .NET. Long-term player: nine years in the same agency, running projects end to end, solo or with a team.

I own what I ship: I monitor it, run it, debug it and page myself. Known for fast, thorough code reviews. I lead small teams. Since 2018 I have mentored colleagues by pairing with them and raising them along, not as a boss: I believe in leading by example. I put AI agents to work on real products and keep them in check with agent skills, guardrails, an end-to-end test obsession, monitoring and observability.

Education and work experience

In 2014 I have earned a **Bachelor of Science** degree in **Computer Science** at the **Faculty of Computer Science and Management** of **Wroclaw University of Science and Technology**.

Commercial work

July 2017 - present
Sanddev sp. z o.o. · Senior Full-Stack Engineer · TypeScript, React, C#, AI

July 2021 - March 2023
PGS Software / Xebia · Omio, Nate, Sage · TypeScript, React, React Native

2012 - July 2017
Self-employment · 25+ apps, 3.7 million+ downloads · C#, XAML, ASP.NET

Job paths

Since 2023
Full-Stack Product Engineer · TypeScript, React, Node.js, AI agents

2017 - 2023
Full-Stack Web Developer · TypeScript, React, Node.js

2012 - 2017
Windows App Developer · C#, .NET

Before 2012
Game Developer · C++, C#

Skills

AI and agents

Claude Code · Codex · Agent Skills · Model Context Protocol (MCP) · OpenAI API · Prompt and context engineering · LLM-as-judge · Evals
RAG · pgvector · Guardrails

JavaScript and TypeScript

React · TypeScript · JavaScript · Next.js · Node.js · HTML · CSS · Responsive design · Storybook · React Native · Electron · Zod · i18n
Tailwind CSS · Webpack

APIs and data

REST · OpenAPI / Swagger · WebSockets · Server-Sent Events · Express.js · SQL · PostgreSQL · MongoDB · Redis · OAuth 2.0 · Web security

C# and .NET

C# · .NET · ASP.NET · XAML · MS SQL

Tools and soft skills

Playwright · Jest · Visual regression testing · axe (accessibility) · Checkly · End-to-end testing · Git · GitHub · GitHub Actions · CI/CD

Docker · nginx · Cloudflare Workers · Cloudflare · Vercel · PostHog · Datadog · OWASP ASVS · Jira · Scrum · Scrum Master · Code review

Mentorship

Projects

Agent skills platform

September 2026 - present

Sanddev sp. z o.o.

Productized a multi-agent code audit as a Claude Code skill: repository in, client-ready PDF report on security, production readiness and maintainability out, with a priced fix plan. Ran on 10+ repositories, detailed reports of up to 365 pages.

Introduced audit-driven development: audit, fix, re-audit. It runs as a loop across our production products.

Added GEO/SEO visibility and DNS and email-security audits. Set up the shared platform on which three colleagues now ship their own skills.

Patriot Mail

May 2025 - present

Sanddev sp. z o.o.

Email client: a web app plus iOS and macOS apps on the App Store.

Shipped a greenfield Next.js client and, with a colleague, iOS and macOS apps to the App Store in four months.

Built the delivery pipeline: Playwright end-to-end suite, Checkly checks and PostHog observability. Output with one colleague and AI agents: 5,000+ commits a year, up from ~2,000 a year on my own.

Turned early experiments with agent-written code into a reviewed, repeatable process: an agent opened ~30% of merged pull requests in 2026 and I reviewed ~85% of them.

Passed Google's CASA Tier 2 security assessment (certification and recertification) and Yahoo's OAuth review.

Integrated IMAP and related mail protocols (dozens of RFCs). Drove WCAG 2.2 AA accessibility with axe checks.

AI content platforms

November 2023 - May 2025

Sanddev sp. z o.o. for undisclosed client

Mentored a new hire from day one through daily pair sessions and code review. Fully contributing within a year.

Built an agentic content platform (2024): tool-call loop, stop conditions, best-of-n, LLM-as-judge and plagiarism checks. It published thousands of fact-checked articles with AI disclosures, plus chatbots in production.

Designed an affiliate discovery system: semantic search over pgvector with query expansion and tiered caching. It grew a seed of ~300 programs into a catalog of 10,000+.

Took over a dashboard for 300+ generated sites. Added git-backed storage, bulk operations, newsletters, AI brand and logo generation, and third-party integrations.

Sandtime.io

July 2018 - present

Sanddev sp. z o.o.

Multiplatform time-tracking SaaS for 4,000+ freelancers and teams.

Founding engineer: built the product from the first commit in 2018 to its first customers, then CI/CD, end-to-end tests and subscriptions. Hands-on in 2018 to 2020, since then review, consulting and growth.

Reviewed and mentored colleagues through 800+ pull requests (2018 to 2026) and onboarded new engineers. Scrum master for four years.

Shipped to eight platforms, from app stores to a Chrome extension, with Electron and React Native.

Took over growth: SEO and AI-search visibility built from near zero, PostHog KPI dashboards, a public MCP server and REST APIs.

Wyrażam zgodę na przetwarzanie moich danych osobowych w celu prowadzenia rekrutacji (RODO, art. 6 ust. 1 lit. a).
